

1. Informant & Parent Details

- Both parents should be included as informants.
 - Parent information should be provided as selectable options, including an option labeled **“Parents”**.
 - Additional option: **“Other”** (e.g., caretaker, warden).
 - If **“Other”** is selected, a blank field should appear to specify the informant.
-

2. School Details

- A **list of schools** should be provided for selection.
 - Include an **“Other”** option.
 - If **“Other”** is selected, a blank field should appear to enter the school name.
-

3. Presenting Complaints / Issues

- Presenting complaints should use a **type-and-suggest system** (auto-recommendations while typing)
 - Additional complaints will be provided and added to the system.
 - **Memory issues** should be included as one of the suggested complaint options.
-

4. Tests Administered

- Tests administered remain as usual.
 - Additional tests will be provided and must be included.
 - **Social Savvy** should **not** be categorized under Educational Assessment.
-

5. Educational Assessment

- Assessment ranges will be provided (for now, use any range)
 - Learning age and reading age require correction.
 - Educational assessment scoring format needs revision.
 - **NIMHANS Math Assessment** should not appear automatically; a better presentation method is required.
-

6. Raw Scores

Items to Remove:

- Verbal Raw Total Score
- Performance Raw Total Score
- Overall Raw Score Total

Display Rules:

- Only **PQ** and **Total IQ** should be displayed.
 - If raw score exceeds the maximum value in the table, the system should assign the **highest possible TQ score** instead of displaying N/A. (check for the mapping of the scores in the 'show norm table')
-

7. Test Findings

- Updated terminology:
 - "Low performance" → **Low level of intelligence**
 - "Average of performance" → **Average level of intelligence**
 - Include: **Borderline level of intellectual functioning**
 - Ensure verbal intelligence categories display correctly.
 - Use the phrasing "**Borderline level of intelligence**" consistently.
 - Final MISIC results should reflect the updated phrasing.
-

8. Summary Section

- Summary should be provided as a dropdown.
 - Explore generating the summary automatically based on:
 - IQ scores
 - Total scores
 - Key report points
-

9. Background & Behavioral Observation

- Should change per child.
 - Text entry will remain allowed.
 - Explore generating background points automatically based on report data.
-

10. Recommendations

- Recommendations section should remain **dynamic**.

- Recommendation options are being generated currently
-

11. BONUS

- Currently, the report is in PDF format, try converting it into a DOC file.
